

CONCORDE RG-380 BATTERY CONVERSION KIT JETSTREAM 3100 & 3200 SERIES

The Infinion Concorde RG-380 Battery Conversion Kit for the Jetstream 3100 and 3200 Series provides significant increase in battery power.

The Battery Conversion Kit offers the advantages of increased spool-up rate, increased battery life, improved battery reliability and enhanced safety and convenience. These advantages allow operators to realize the associated cost savings in the areas of engine overhaul, fuel and operations.

The installation of the kit requires no aircraft modifications as it picks up on existing structural hard points in the Jetstream aircraft. The two-hour installation can be performed immediately.

FEATURES

- FAA, EASA, & Transport Canada STCs
- No aircraft modification necessary
- Convenient and easy conversion
- Complete installation support

Increase spool-up rate

Increase battery life

Improve safety & convenience

Reduce Battery Maintenance

CONCORDE RG-380 BATTERY CONVERSION KIT

Increased Spool-up Rate

Less time in the
critical range

Compressor
rubbing reduced

Priming fuel
reduced

Friction wear
reduced

Increased Battery Life

Engine start-up
stress reduced

Battery reliability
improved

No-start chance
reduced

Improved Safety & Convenience

Emergency
power increased

Bus inter-tie
engaged longer

Reduce Battery Maintenance

Eliminate
temperature
monitoring system
