The X-Lift is designed to support Air Ambulance missions by removing the lifting during patient loading, reducing the risk of injury to the medical transfer personnel and to the patient.

SPECIFICATIONS:

Lift Capacity – up to 1,000 lb.

Compatibility - Requires Skytek long ramp for airstair doors, or modified LifePort ramp for cargo doors

Power – 28 VDC – 10 Amps. Wiring kit is available to tie into the aircraft battery bus.

Weight – 25 lb (11 kg)

Stowage – Fits in Raisbeck wing locker with standard or long loading ramp and pogo stick
